

Optometry

Do bring your glasses and wear them when processing at 30 AG reception. Do not wear your contact lenses, because you will not be allowed to wear them when in training, per DA Pam 40-506.

(The training environment is not conducive to contact lens wear! The longer you are out of your contact lenses before you are checked by the Optometry Service at 30AG the more accurate your prescription will be.)

If you have had refractive surgery, bring a copy of your pre-surgery glasses Rx or contact lens RX. If you do not have the prescription but have your old glasses, bring them to the 30AG reception when processing. (Do not put them in your personal bag until you are seen by the Optometry Service).
